AT digitals

Company Profile

at digitals

About Us

Since 2017. For 220+ successful clients, we transformed businesses with powerful and adaptable digital solutions that satisfy the needs of today and unlock the opportunities of tomorrow. We have a well established offshore software development centre in India led by two co-founders, who are driven by their endless passion in the Service and SaaS industry.

From fortune companies to the next generation startups, we team up with all of them on a long term basis to drive their business forward with thoughtful design, value-driven user experience and scalable development.

Our Mission

We're a tech company with a mission to help successful companies extend their tech capacity. Founded in 2017, we have helped organisations ranging from Startups, to Fortune 500 companies, and WHO featured NGOs.

Our Team

We have over 30 IT professionals on board, who are highly skilled, well organised & experienced. Our team of Full Stack Developers, iOS/Android Developers, UI/UX Designers & Cyber Security Experts, can assist you in transforming your business with the latest tech capabilities to stay ahead of the curve.

We add development capacity to tech teams. Our value isn't limited to building teams but is equally distributed across the project lifecycle. We are a custom software development company that guarantees the successful delivery of your project

How development through AT Digitals works ?

- Assemble the right team
- Tech Architecture
- Sprint planning

Our Projects

01. Rakuten

Rakuten's repository-based application stores and manages data in a central repository, enabling efficient collaboration, version control, and easy access to shared resources.

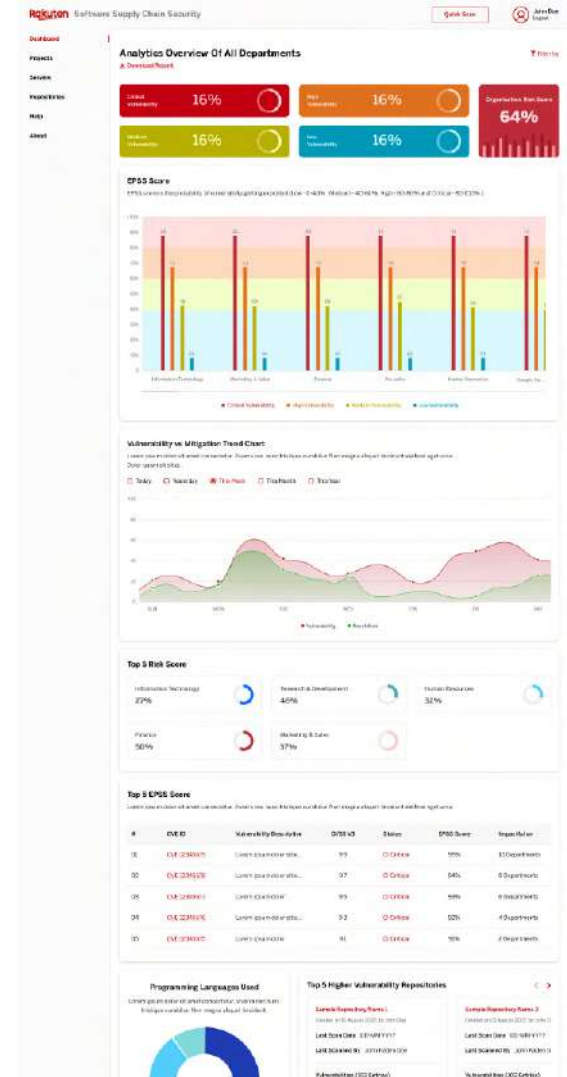

We also provide a feature "Quick scan" which helps user to scan any file from their local.

Each and every repository has a summary which is shown to the user upfront.

This is a "Quick scan report screen" which talks about the vulnerabilities in the file.

Homepage - shows details of everything such as vulnerability count, repository count, projects associated, report

Ticket History Page - We also provide the feature for the user to view all their past tickets which has been closed.

Other Projects

04.PMD Beauty

PMD Beauty is a globally renowned premier beauty company offering smart beauty tools and skincare products. We developed and launched their business on the Shopify E-commerce store - as a headless e-commerce. The storefront is built as a single page application with Angular and consumes APIs from Shopify via graphql to load product, order, and user account information. Every region has an individual Shopify site and the staging points to the US site. The checkout flow is purely handled via Shopify & Recharge. Middleware built-in Node.js functions as the connection between the Shopify site, ERP application & Warehouse.

05.Gunnar

GUNNAR designs and engineers Computer Eyewear to protect and enhance vision using revolutionary technology solutions. GUNNAR introduced the Technology Eyewear category in 2008 and pioneered the only patented lens technology to reduce digital eye strain and fatigue issues associated with computer use. We developed and launched their business on WooCommerce. Gunnar has multiple sites in all regions around the globe, and everything would be connected to a single staging site. We did many complex features like Virtual Try enabling the users to try out their eyewear through their device's camera. With multiple product categories coming in, Gunnar demanded multiple plug-ins available in the market to enhance the smooth usage for the user.

Other Projects

06.Pulse Labs

Pulse Lab AI, Inc., based out of Salt Lake City, is an AI-powered data acquisition, management, and analysis platform. Leaders in technology across the globe use the Pulse Labs' platform, including Google, Amazon, technology suppliers, automakers and major mobility application companies. We were instrumental in developing a comprehensive user testing solution for Alexa and Google Assistant using Spring Boot and Angular. Also, we managed the development of a novel GoPro-based solution for Google's user experience research. We also use that expertise to share innovative perspectives that challenge the status quo.

07.Indulgent Foods

Indulgent Foods began over 20 years ago with the introduction of Stephen's Gourmet Hot Cocoa mixes into local grocery stores in Utah and Idaho. We offer over 30 products under 4 market-leading brands: Stephen's Gourmet Hot Cocoa, Double Dips Dipping Sauces, Pacific Chai Lattes, and Straw Propeller Gourmet Oatmeal. We developed and launched their business on the Shopify E-commerce store - as a headless e-commerce. Shopify serves as the backend for product management and checkout flow. The checkout flow is purely handled via Shopify & Recharge. As mentioned above, all 4 brands have to be handled under one shop Indulgent Foods, so we executed the multi-vendor concept in order to track four different brands in one Shopify store.
